

[FIRST NAME],  
**READY FOR YOUR PATIENTS TO TRY EVERSENSE E3**

**Eversense E3 CGM lasts up to 6 months with a single sensor. Help your patients break free from traditional CGM systems with an implantable CGM for long-term wear!**

**Help Your Patients Say Goodbye to Traditional CGMs & Hello to Eversense E3!**

Dear [First Name],

It's time to help your patients say goodbye to traditional CGMs and **say hello to the only long-term, implantable CGM, Eversense E3!**

Whereas most traditional CGMs require sensor replacements every 7 to 14 days, the Eversense E3 sensor lasts **6 months**. And that means your patients only need **2 sensors per year** vs. up to 26-52 with other CGMs!

Plus, with an **easy-on, easy-off\*\* transmitter, on-body silicone-based, fresh daily adhesive**, you can help your patients more easily manage their diabetes.

Sincerely,  
Your Eversense Team

**Ready To Help Your Patients Break Free With Eversense E3?**

**[FIRST NAME],  
6-MONTH\* CGM IS HERE!**

Meet Eversense E3, the only implantable sensor for long term wear. Help your patients break free from traditional CGM systems with long-term, implantable CGM!

**Help Patients Break Free With the Eversense E3 CGM!**

Dear [First Name],

Ready to help your patients manage their diabetes with **more confidence** and **less stress**?

With Eversense E3's under-the-skin CGM sensor, your patients avoid the bi-weekly hassle of sensor changes and site maintenance, helping them to **manage their diabetes with more flexibility**.

While all CGM systems use a sensor that's inserted under the skin every 7-14 days, only **Eversense E3 has a sensor that lasts up to 6 months**, eliminating the hassle and discomfort of frequent sensor insertions.

**Ready To Help Your Patients Break Free With Eversense E3?**

Sincerely,  
Your Eversense Team

**Break Free From**

- Ongoing CGM supplies to carry and order
- Wasting sensor when transmitter is removed and replaced
- Accidental sensor dislodging
- The weekly or bi-weekly hassle of sensor changes and site maintenance
- Concerns about an adhesive having to last up to 14 days

## [FIRST NAME], MEET OUR NEW CGM, EVERSENSE E3!

**Eversense E3 is the only implantable sensor for long term wear. Break free from traditional CGM systems with the only long-term, implantable CGM!**

## Break Free With the Eversense E3 CGM!

Dear [First Name],

Continuous Glucose Monitoring systems are already a standard of care for managing your diabetes.

### But who says you have to stick with a traditional CGM?

**Eversense E3 is the only CGM system with a sensor that is completely inserted just under the skin and lasts up to 6 months**, eliminating the hassle and discomfort of frequent sensor insertions.

With Eversense E3, you can get **exceptionally accurate readings over 6 months**, helping you **manage your diabetes with confidence**.

Simply put, **Eversense E3 is a game changer when it comes to helping you manage your diabetes**.

Sincerely,  
Your Eversense Team
